SCHÜTTGUTTECHNIK

AGRICHEMA

We keep bulk solids flowing

Your task

Again and again, you are faced with a range of challenges such as:

Loss of performance

Variations in quality

Increased energy consumption

Time-consuming cleaning works

Risk of accidents when working in hot areas

Safety questions when handling explosive bulk solids

Environmental pollution

Bulk solids exhibit a wide array of flow behaviours, due to their different physical properties and the wide range of technical production processes.

Possible causes:

Material deposits

Blockages

Flow problems

Bridging and channel formation

The bulk solids' properties

Legal requirements

Our solution approach

Are you looking for well-founded experience and solutions in relation to handling bulk solids?

Great! We've been keeping bulk solids flowing for more than 40 years. Combined with commitment and dependability. That's our trademark.

We love bulk solids. On your behalf, we've been right in the thick of them, with passion and enthusiasm, for more than 40 years.

We take care of interfaces to your system, and optimise your flow of bulk solids.

AGRICHEMA can provide you with a tailor-made solution to the widest range of bunker and silo discharge problems, with a focus on economic efficiency and safety-related matters.

The range is completed by components for shutting off, distributing and metering, as well as for loose-loading bulk materials.

Keep bulk solids flowing

Clear material deposits

Trouble-free discharge

Optimise processes

Dust-free loose loading

Dependable service

AGRICHEMA's service is characterised by more than 40 years' experience in bulk solids technology, combined with commitment and reliability.

Reliability, needs-orientated maintenance plus an instinct for the things that really matter secure for you the desired system availability.

Our fitters, with their fleet of suitably equipped service vehicles, take care of your system with the utmost commitment.

We are continuously improving occupational safety for our employees. In order to achieve and guarantee this, we have our own safety expert.

All our fitters have an SCC (contractor safety) certificate in accordance with Document 016.

Is your system at a standstill?

We are quickly on site with the correct equipment and team.

We get to the bottom of the cause, and implement straightforward, lasting solutions.

Reliability thanks to maintenance

We would be pleased to supply you with a tailor-made servicing and solution concept for your specific needs.

Increase your system's availability by early detection of imminent potential malfunctions.

System availability, the greatest asset of all

Look forward to a service team that knows every trick in the book.

Well-prepared, quick, reliable and always right at the heart of the action with the appropriate manpower and equipment.

It is for precisely this reason that our service is there for you. Our experienced team knows what's really important.

Dependability knows no compromise.

Short repair times and downtime enable you to achieve high system availability.

Individual servicing concepts

Looking for a personal servicing concept? Perfect. That is our strength. Whether you need servicing at regular intervals, flat rate packages or would like us to assume complete responsibility for the organisational tasks. We would be pleased to help you.

The SHOCK-BLOWER® system enables you to safely clear material deposits and therefore keep your bulk solids flowing.

AGRICHEMA's air-blast devices provide you with tailor-made solutions for many areas of the bulk solids industry

SHOCK-BLOWER®

Air Blast Units

Clearing material buildups and deposits increases productivity.

Your benefits

Reactivate existing silo capacities

Activate bulk solids that have solidified over time

Eliminate bridging

Prevent the occurrence of channels in silos

“

Safely guaranteeing high system availability, without the risk of unnecessary costs – that's AGRICHEMA.

”

Bulk solids – examples

Keep your bulk solids flowing, whatever their structure!

Benefit from our experience and proven solutions in all sectors of the bulk solids-processing industry.

A safe system for the future

Our innovative solutions for the bulk solids industry increase your business's economic efficiency.

The factors for your success:

- AGRICHEMA's recognised knowhow
- Comprehensive range of services
- Personal consultation on site
- Mature product systems

Satisfied customers are the best proof of successful work.

You can find us conveniently located off the A61 motorway in the Waldlaubersheim industrial estate:
